Data & AI Engineer | Analytics | Databricks | AWS | SQL | PySpark | BI

PROFESSIONAL SUMMARY

Data and AI professional with 10+ years of experience across Business Operations, Risk/Fraud operations, currently into Data Analytics, Data Engineering, and AI systems development, with strong written and verbal communication skills.

Built a progressive data-focused career path through roles involving structured data analysis, transactional data monitoring, AI model evaluation, end-to-end data pipeline development and customer experience. Experience spans fintech, SaaS, AI-driven platforms, and e-commerce environments in international, fast-paced settings. With a great ability to manage multiple tasks and deadlines and willingness to learn and develop analytical skills.

Hands-on experience with SQL, Python, ETL/ELT processes, data modeling, APIs, and Cloud (AWS/Azure), combined with applied work in Retrieval-Augmented Generation (RAG), LLM workflows, and AI evaluation systems. **Strong ability to translate business problems into data-driven and automation-oriented solutions.**

Core Skills & Technologies

- **Data & Analytics / BI:** Data Analytics, Exploratory Data Analysis (EDA), SQL, Python, Power BI, Tableau, Statistical Analysis, KPI Analysis, Reporting, Business Insights, Data Storytelling, Orange Data Mining, Presentation Skills, Business Analytics, Microsoft Excel, Data Visualization, Dashboards.
- **Data Engineering & Cloud:** Databricks, PySpark, Pandas, Data Cleaning, Data Validation, Data Transformation, ETL/ELT Pipelines, Data Modeling, AWS Cloud Fundamentals, CloudWatch, AWS Lambda, IAM, APIs, Git, GitHub, Data Manipulation, Data Governance.
- **Artificial Intelligence:** Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Evaluation, AI Automation, LLM Workflows, Amazon Bedrock, OpenSearch Serverless.
- **Business & E-commerce:** Stakeholder Management, Process Improvement, Cross-functional Collaboration, Detail-Oriented, Agile, Business Performance, Scrum, Shopify, Klaviyo, ParcelLab, AfterShip, Make, Jira, Zapier, Airtable, Zendesk, HubSpot, Kustomer, Richpanel, Key Performance Metrics/Indicators.

SELECTED CAREER HIGHLIGHTS

- 10+ years of international experience across Business, Operations, AI, SaaS, and Technology.
- Successfully partnered with global organizations in AI, e-commerce, fintech, and software industries.
- Delivered data-informed recommendations supporting client retention, operational improvements, and strategic decision-making.
- Built expertise at the intersection of Business, Data, Automation, and Artificial Intelligence.
- Currently specializing in Data Analytics, Data Engineering, Cloud Technologies, and AI solutions while completing higher education in Data Analytics.

PROFESSIONAL EXPERIENCE

UOL Compass AI/R — IT Services & Consulting | Remote

Data Engineering & AI | April 2026

- Produced 5 end-to-end data engineering projects using Python, SQL, PySpark, Airflow, Pandas and AWS to ingest, clean, transform and prepare structured datasets for analytical and AI use cases.
- Built 4 ETL/ELT pipelines using Databricks, Python, SQL, Amazon S3, REST APIs and JSON to automate data ingestion and transformation workflows, and performed data cleaning, data wrangling, and data validation to ensure dataset accuracy and consistency.
- Applied Pandas, SQL queries and data modeling techniques to validate, clean and preprocess datasets before downstream analytics and AI applications.
- Developed 2 Retrieval-Augmented Generation (RAG) prototypes using Amazon Bedrock Converse API, Titan Embeddings, OpenSearch Serverless and Python, integrating structured and unstructured information for AI-assisted knowledge retrieval.
- Worked with AWS Lambda, IAM, CloudWatch and Git/GitHub to support cloud-based application development, version control and collaborative software engineering practices.
- Built AI-powered workflows using prompt engineering and Amazon Bedrock foundation models, exploring LLM orchestration and automation for business productivity.
- Collaborated within Agile teams through sprint ceremonies, peer reviews and technical documentation while

contributing to shared Git repositories.

- Used data visualization to analyze structured datasets using Power BI, Pandas, Matplotlib and Orange Data Mining to create dashboards, and communicate analytical findings and support project development.

FlyRank — AI Services & Consulting | Remote

Data Engineering & AI | April 2026

- Evaluated 220+ AI-generated responses weekly using structured evaluation guidelines to assess factual accuracy, contextual relevance and instruction adherence.
- Validated structured and unstructured datasets, identifying inconsistencies and supporting improvements in AI output quality before production delivery.
- Tested 20+ prompt variations across multiple business scenarios to improve LLM response quality and consistency.
- Performed qualitative and quantitative analysis of AI-generated content, documenting recurring issues, hallucinations and edge cases to support iterative model improvements.
- Collaborated with cross-functional teams to refine evaluation rubrics, testing procedures and quality assurance documentation.
- Monitored AI evaluation trends and contributed actionable feedback to improve LLM evaluation workflows and annotation consistency.

Blaze — Fintech | Remote

Payments & KYC Analyst | Data, Risk & Fraud Operations | May 2024 – June 2026 (2 years)

- Investigated 350+ payment verification and KYC cases weekly using proprietary fraud monitoring platforms to support operational risk decisions.
- Performed customer identity verification and compliance checks while ensuring adherence to regulatory requirements and internal KYC policies.
- Evaluated 1000+ transactional records to identify fraud indicators, suspicious activity patterns and operational risks.
- Conducted investigative analysis supporting account approvals, payment restrictions and fraud escalation decisions using internal risk management systems.
- Orchestrated 850+ cross-functional investigations with Payments, Fraud, and Support departments, resolving over 15 complex operational cases weekly.
- Analyzed fraud trends and operational KPIs to generate data insights supporting fraud prevention initiatives and operational improvements.

Nathan James — E-commerce | Remote

Customer Success Manager & Operations | January 2024 – April 2026 (2+ years)

- Managed a portfolio of 45+ customer accounts, monitoring customer health scores, NPS, product adoption, engagement KPIs and churn indicators throughout the customer lifecycle.
- Identified customer behavior using Kustomer, Shopify, Klaviyo, ParcelLab and AfterShip, identifying adoption trends, customer risks and account growth opportunities.
- Built 3 workflow automations using Make, Airtable, Kustomer and reducing repetitive operational tasks by 25% and improving internal team efficiency.
- Partnered with Product, Engineering and Support teams to translate customer feedback into product enhancements and operational improvements.
- Delivered data-informed recommendations based on customer usage patterns and business metrics, supporting customer retention and long-term account growth.
- Created 8+ operational documentations, standardized playbooks and scalable Customer Success processes adopted across distributed teams.
- Generated actionable data insights from customer behavior and operational KPIs, supporting customer retention strategies and business decision-making.

LANGUAGES

Portuguese (Native) • English - C2 (EF SET 74/100) • Spanish (Intermediate/Conversational)

EDUCATION BACKGROUND

Bachelor's Degree in Database Technology (Data Analytics) (in progress)

PUCRS Pontifícia Universidade Católica do Rio Grande do Sul | Jan/2025 – June/2027

Bachelor's Degree in International Relations

State University of Paraíba (UEPB) | Jan/2011 – Dec/2014
